

Company Profile

Kwikspace Modular Buildings is a leading designer, manufacturer and erector of prefabricated buildings for deployment in Sub-Saharan Africa. We have been accommodating our clients in the oil & gas industry, power generation, construction, mining and government sectors for over 40 years and are one of the largest and most diverse suppliers of prefabricated buildings on the African continent.

We supply site erected buildings, rapid deployment units and fully equipped shipped-to-site structures, allowing our customers to manage projects and accommodate their people with varying degrees of urgency, demand and cost effectiveness. All of our buildings are assembled using fully insulated polyurethane injected panels, which provide temperature control and noise reduction far superior to standard prefabricated panels.

Our South African factories in the cities of Johannesburg, Cape Town and Durban allow us to respond quickly to projects in the SADC region as well as further along the West and East coasts of the continent. We have our own professional logistics department which manages loading, transport, materials management and siting to support timely project progress.

Whether it's a personnel camp, site offices, classrooms, clinics

or ablutions you need, Kwikspace has a speedy solution for your organisation - wherever the location and whatever the conditions. Our buildings can be ordered with air-conditioning, furnishings, burglar proofing, insect control, equipped kitchens and laundries, further simplifying your project procurement processes.

Why not call us now and allow one of our sector specialists to assist you in choosing an accommodation solution that best suits your needs?

With over 40 years experience in mobile systems, Kwikspace Modular Buildings is clearly your export choice.
