Our Certifications

When compared to other alternative construction solutions, Kwikspace's locally made polyurethane panel provides greater strength and thermal qualities. Our panels do not delaminate, and our structures have a 20-year life expectancy if properly maintained.

Kwikspace KwikPremium Panel Specification

- Panel Description 0,42-0,47mm chromadek with polyurethane core
- Density 36kg/m³
- Acoustic Properties 32db
- Thermal Properties R= 1.82m² K/w
- Size 1,160mm (w) x 2,4m - 3m (h)
- Thickness 40mm

Kwikspace KwikFire Panel Specification

- Panel Description 0,42-0,47mm chromadek with polyurethane core and 12mm Magnesium Oxide board
- Density 36kg/m³
- Acoustic Properties 39db
- Size 1,160mm (w) x 2,4m - 3m (h)
- Thickness 40mm
- Fire Classification FR30 External Wall

Kwik Kits are available in both our KwikPremium and KwikFire panel ranges; whether you want an Agrément system, or a cost-effective industry approved system, we have the solution for you!
